First Slide

■ First bullet

Avoid using too many bullets. It is better to use paragraphs.

- Especially nested bullet lists
- That make it hard to understand the main point

■ Second bullet

Nonetheless sometimes you are stuck at using bullets. In such cases, make sure that the bullets look nice.

Sample Slide

Thus, I came to the conclusion that the designer of a new system must not only be the implementer and first large–scale user; the designer should also write the first user manual.

The separation of any of these four components would have hurt $T_{\!E}\!X$ significantly. If I had not participated fully in all these activities, literally hundreds of improvements would never have been made, because I would never have thought of them or perceived why they were important.

But a system cannot be successful if it is too strongly influenced by a single person. Once the initial design is complete and fairly robust, the real test begins as people with many different viewpoints undertake their own experiments.
